

CALLERS

PARIS, MARCH 16 & 17, 2020 13TH FINANCIAL RISKS INTERNATIONAL FORUM

“THE RISE OF FINTECHS: CAN NETWORKS AND PLATFORMS DISRUPT TRADITIONAL FINANCIAL INTERMEDIATION?”

The **Financial Risks International Forum** on “**The Rise of Fintechs: Can Networks and Platforms Disrupt Traditional Financial Intermediation?**” is an International Research Forum for academics and professionals organized by **the Louis Bachelier Institute**. We invite academics, professionals and regulators to submit research papers for this event, which will take place in **Paris on March 16 & 17, 2020**.

Digitalization is reshaping economic activity, especially in the financial sector. Start-ups and technology firms are disrupting conventional banks and insurance companies by introducing new products and technologies, such as new forms of payment (mobile, peer-to-peer), money (crypto and digital currencies), lending (peer-to-peer, crowdfunding) and advice (digital and robo), frequently offered on network platforms. Advances in computing have enabled the use of new datasets (such as online consumer transactions, social networks or satellite images) and forecasting techniques, with extensive use of machine/deep learning techniques. These technological changes have the potential to deliver significant benefits to financial services. Network platforms simplify business and clients’ interactions, but they also modify the competitive landscape, give rise to new risks for borrowers, consumers and investors, and potentially challenge financial stability.

This upcoming **13th Financial Risks International Forum** aims to highlight the methodological and regulatory challenges raised by the on-going developments in financial technologies.

PAPER SUBMISSION

*Complete papers in PDF format should
be submitted electronically by **DECEMBER 5, 2019***

*The results of the selection procedure
will be announced by mid-January 2020.*

EXPENSES
